US Army Corps of Engineers
Peterson AFB Resident Engineer
April 13, 2010 • 8:00 am - 4:00 pm

Pikes Peak Regional Building Department
2880 International Circle, Colorado Springs, CO 80910

Fee: \$125.00 per person for members and non-members
Register soon! This class fills up fast!

The Corps of Engineers requires all contractors performing construction for them to comply with the "Contractor Quality Control" (CQC) requirements in their contracts. In cooperation with the construction industry, the Corps developed this training course for the purpose of familiarizing all quality management personnel with the Corps on Engineers, Construction Quality Management (CQM) policies and procedures.

The course details the requirements of the contractor personnel and the government personnel assigned to the project and the reasons for those requirements. The effectiveness of the CQM system is enhanced when all personnel are aware of their responsibilities and the reasons for them. To ensure the success of the CQC system it is a contract requirement that the contractor's quality control representative take this training.

Maximum class size will be 30 participants. Registration must be prepaid. Seats are limited to two (2) seats per firm. Your firm may request additional seats in the session in case the class is not filled. Any remaining slots will be filled on April 1st. Your firm may make substitutions if someone is not available to attend. However, if the substitution is made after 12:00 noon on April 8th, the printed certificate of completion will need to be mailed.
