

Airgas

Airgas Intermountain

Airgas Intermountain covers most of the Rocky Mountains and the surrounding area, with 39 locations serving Utah, Idaho, Colorado, Wyoming, and Western Nebraska. The region office is located in Denver, Colorado.

Airgas Inter-Mountain is comprised of two former Airgas Hubs, Mountain and Great Western Airgas, and two recent acquisitions, Industrial Gas Products based in southern Colorado and Gas House based in Pocatello, Idaho.

The company serves a diverse market ranging from steel fabrication to agriculture. Airgas has provided support for cancer research and bioengineering, coal, copper, and gold mining, and Steel production. Airgas Intermountain is equipped to meet the gas and hardgood needs of this multifaceted area.

The region has a fleet of bulk trucks for liquid distribution, and will soon complete a state-of-the-art filling facility in Salt Lake City to expedite gas distribution. In order to provide knowledgeable solutions for our customers, Intermountain employs experts in safety, industrial coatings, weld engineering, and medical and industrial gas technology.

Workforce Development Options

Airgas can offer classroom speakers discussing topics that range from welding to safety related products, the use of various gasses within the industry. Field trips, job shadow opportunities and donated supplies are also available. Please contact Denton Thompson at 970-484-3680 or denton.thompson@airgas.com for more details. Airgas is located at

305 Air Park Drive
Ft Collins, CO 80524

Visit their website at www.airgas.com

Building with the timeless materials of brick and stone requires a true appreciation for quality. And constructing with nature's finest; most enduring medium to create the world's oldest art form takes the work of a seasoned professional.

For a quarter of a century now, the artisans of AP Eberlein Company have been creating a legacy for our future generations. Eberlein's sophistication and expertise in this age-old art of masonry remains unparalleled in the industry.

"When you're working with materials as old as 250 million years, you're dealing in permanence. Masonry is an extension of the architect's arm, as we work together to build a structure that will stand the test of time to become an enduring piece of the community." – Pem Eberlein, President of AP Eberlein CO.

Workforce Development Options

AP Eberlein can offer job shadow and internship opportunities. Please contact Pem Eberlein at 970-535-9380 or pemeberlein@eberleincompany.com for more details. AP Eberlein is located at:

14355 Mead Street
Longmont, CO 80502

Providing Tradespeople to Contractors Since 1987!

Take the guesswork out of your manpower planning.

When you work with CLP, we'll handle the administrative burdens of recruiting, hiring and employing tradespeople so you can focus on what you do best - building! CLP provides construction staffing to contractors nationwide. Our trades employees are reliable, skilled and matched to your specific requirements. Every time.

Are you a skilled tradesperson?

CLP recruits and hires the best and brightest tradespeople around. We'll keep you working project to project, on construction jobs that match your skills, interests and experience, on sites you can take pride in.

Workforce Development Options

CLP can offer classroom speakers to discuss work ethics and work culture, and will conduct mock interviews. For more details, please contact Paula Eastin at 970-622-9836 or at peastin@clp.com. CLP is located at

1907 Boise Ave Unit 6
Loveland, CO 80538

Visit their website at www.clp.com

Colorado Machinery

Colorado Machinery traces its John Deere roots back to 1928 and commencement of the Romer-Young Mercantile stores in Holly, Colorado.

In 1968 and 1969 Romer-Young Mercantile opened three John Deere Construction Equipment dealerships in Colorado. These stores were: Southern Colorado Equipment in Pueblo, Central Colorado Equipment in Colorado Springs and Larimer Equipment Company in Fort Collins.

In January 1994, all 3 stores merged to form Colorado Machinery.

Colorado Machinery has been serving the construction industry in Colorado for over 30 years. We are continuing towards our goal to be the finest service company in Colorado with 4 locations to serve you.

Workforce Development Options

Colorado Machinery can offer classroom speakers addressing workplace safety, work ethics and work culture, specific skills training and support, workplace examples that support academic skills; math, science, physics, verbal skills/communication, and testimonials from industry reps. There are field trip and job shadow opportunities as well as available internships. For more details, please contact Todd Niermeyer at 970-482-7154 or tniermeyer@coloradomachinery.com. Colorado Machinery is located at

125 John Deere Drive
Ft Collins, CO 80524

Visit their website at www.coloradomachinery.com

ENCORE electric

Encore Electric, Inc. is a Colorado based company that focuses on delivering to its customers a wide array of Electrical Construction Projects and Maintenance Services. FCI Constructors began building in Colorado in 1978, expanding to Arizona and the surrounding region in 1986. Proudly, we've recently moved into Wyoming. Since 1998, FCI has been recognized as one of ENR's Top 400 contractors with revenues exceeding \$290 Million. As one of the most versatile General Contractors and Construction Managers, with five offices in Colorado, Arizona and Wyoming, and over 300 employees, we dedicate ourselves to serving our clients. Our employee-owners take pride in what we do, and for our clients – we take care of the details – to ensure smooth transitions from building concept to project completion.

Workforce Development Options

FCI Constructors can offer classroom speakers discussing workplace safety, work ethics and work culture, estimating processes, building layout, communication, and writing effective resumes. They have field trips and job shadow experiences available. Please contact Sarah Armstrong at 970-535-4725 or at samstrong@fciol.com for more details. FCI is located at

4001 N Valley Drive
Longmont, CO 80504

Visit their website at www.fciol.com

Flood & Peterson Insurance, Inc.

Flood & Peterson, one of the Rocky Mountain region's largest insurance brokers, is an employee-owned company whose staff advise organizations nationwide on how to reduce risk, maximize operational efficiency and boost revenue. The company has a long and successful history of working closely with contractors, subcontractors and other construction-related firms in the areas of risk management, commercial insurance, employee benefits and surety bonds.

Flood & Peterson builds continuous relationships with clients. Too often, firms in this industry have infrequent customer interactions. They may meet with a client once a year for policy renewal or are sluggish in their response time.

Not Flood & Peterson. We aspire to be long-term business partners involved in our customers' day-to-day business operations, advising and helping them make important business decisions. **Our goal:** to be a trusted business partner and advisor guiding clients as they lower overall risk, boost operational efficiency and competitiveness, and maximize profits.

Workforce Development Options

Flood & Peterson Insurance offers classroom speakers who specialize in workplace safety. For more information, contact Sean Gingrich at 970-266-7106 or sean.gingrich@fpinsurance.com. Flood & Peterson Insurance's four offices are located along the Front Range:

Denver – 720-977-7110
Greeley - 970-356-0123
Fort Collins - 970-266-8710
Eaton - 970-454-3381

Visit the company's website at www.fpinsurance.com

Gregory Electric's integrity and outstanding service are found at every level of the company. High standards and values are the reasons for its many repeat customers.

The company maintains a team attitude and great communication with clients and employees. Gregory Electric's personnel possess innovative attitudes and problem solving abilities. Gregory Electric has been engaged in electrical contracting along the Front Range since 1986. The company specializes in commercial, industrial, multifamily and single family residential. The company considers job safety its' highest business priority, attested by several safety awards from the Associated Builders and Contractors and other industry leaders.

Workforce Development Options

Gregory Electric can offer classroom speakers addressing workplace safety and testimonials from industry representatives. For more information please contact Rod Bryant at 970-669-7609 or at rbryant@gregoryelectricinc.com. Gregory Electric is located at

3317 N. Lincoln Ave
Loveland, CO 80538

The values of honesty, integrity and reliability permeate every level of company operations. On all projects, Greiner electric develops and maintains a positive team atmosphere and clear communication with clients and employees. Greiner Electric professionals insist on service, equipment and installation exceeding customer expectations, one of the reasons behind Greiner Electric's many repeat clients.

Major Greiner Electric strengths include innovation and problem-solving. Through conceptual budgeting, value engineering (identifying the most cost-effective solution) and quality craftsmanship, Greiner Electric has established a record of high-level electrical construction and service while maintaining tight budgets and fast schedule.

Workforce Development Options

Greiner Electric can offer classroom speakers addressing workplace safety, work ethics and work culture, specific skills training and support, workplace examples that support academic skills; math, science, physics, verbal skills/communication, and testimonials from industry reps. There are field trip opportunities as well as job shadowing experiences available. Please call Gregg Banks at 303-470-9702 or at gbanks@greinerelectric.com for more details. Greiner Electric is located at

12456 Dumont Way
Littleton, CO 80125

...providing electrical solutions

Interstates Construction Services is a nationwide electrical contractor providing construction, engineering, instrumentation, automation, and panel fabrication for a wide variety of clients and industries. Our dedication to building client relationships through our commitment to safety, quality, dependability, and integrity has been the foundation of every project for the last 55 years.

Interstates established a regional office in Fort Collins, CO in 1996 to provide a long term stable workforce for our clients in the Rocky Mountain Region. Since that time we have performed on-going project work for clients such as:

Anheuser-Busch
New Belgium Brewing
Colorado State University
University of Colorado
Kodak
Laramie County School District #1
Platte River Power Authority

Top quality installation, combined with innovation, distinguishes Interstates from the rest. If you are looking for more in your electrical solution provider, Interstates Construction would like to put our qualifications to work for you.

Workforce Development Options

Interstates Construction Services has classroom speakers available to discuss workplace safety, work ethics and work culture, electrical skills, plan reading, and workplace examples of math, magnetism physics, and signwaves. Interstates Construction Services is located at

2636 Midpoint Drive
Ft Collins, CO 80526

Visit their website at www.interstates.com

Currently our revenue exceeds \$50 million with a controlled 5 year growth plan in place to reach \$100 million. We work on open shop projects throughout the United States on various construction projects. Additionally, we are the only subcontractor in the United States to achieve the prestigious VPP (Voluntary Protection Program) partnership with OSHA.

Key to our performance is our team of experienced journeymen who serve on the front lines representing LPR as true professionals to our customers on a day-to-day basis. In a business characterized by high turnover, we are proud that the average tenure among our full-time field personnel is several years higher than the industry standard. Many of our Project Managers and Superintendents average 15-25 years of service.

On every project we undertake LPR strives to deliver the highest quality results in the safest possible manner meeting or beating a given schedule. Your success is our success! Owner satisfaction is our ultimate goal.

Workforce Development Options

LPR Construction can offer classroom speakers to discuss workplace safety, work ethics and work culture, specific skills training and support, workplace examples that support academic skills; math, science, physics, verbal skills/communication, and testimonials from industry reps. They also have job shadow as well as internship opportunities and field trips. Please contact Ken Pfannenstiel or Bryan McClure at 970-663-2233 or kennyp@lprconstruction.com. LPR is located at

1171 Des Moines Ave
Loveland, CO 80537

Opening its doors in Minneapolis, Minnesota on April 1st, 1954, M. A. Mortenson Company is a privately held corporation owned by the Mortenson family. At its inception, founder M. A. Mortenson, Sr. established two objectives for the company's future: to sustain steady growth by increasing its revenue annually and to strive to be profitable in every year of its existence. The hard work and long hours expended in those early years paid off as the business thrived and as projects grew progressively larger and more complex.

Today, led by M. A. Mortenson, Jr., the company operates as a diversified construction organization, offering customer-centric services in general contracting, construction management, program management, design-build, project development, and "turn-key" development.

Mortenson has distinguished itself in the construction industry by providing services based on its values; trust, safety, service, responsibility, stewardship and teamwork. Our team members truly believe in serving our customer's interests and having a strong, partnered relationship with each project's owner, designer, engineer, and subcontractors.

In 1969 M. A. Mortenson Company joined the ranks of the builders of *Engineering News Record's* Top 400 list, a numerical ranking by dollar volume of the nation's largest contractors. In 1990 Mortenson reached ENR's list of top 50 contractors, and has remained within the top 50 every year since. In ENR's most recent list, Mortenson was ranked the 38th largest general builder in the country.

Workforce Development Options

Mortenson can offer classroom speakers to cover general construction career opportunities, masonry trades, safety in construction, and careers in construction management. There are summer internships available as well as job shadows and field trips. Please contact Matthew Johnson at 303-295-2511 or at matt.johnson@mortenson.com for more details. Mortenson is located at

1621 18th Street
Suite 400
Denver, CO 80202

Visit their website at www.mortenson.com

Founded in 1962, Shaw Construction provides professional construction services throughout the State of Colorado and in Jackson Hole, Wyoming. Shaw is consistently ranked as one of Colorado's leading General Contractors, Construction Management and Design/Build firms. Our long list of satisfied customers will attest to our professionalism, reliability and expertise with complex projects. Shaw's expertise is deeply rooted in the diversity of projects we have completed for our clients throughout the State. Our personnel have comprehensive experience in building and renovating facilities for affordable housing, aviation, education, entertainment and recreation, hospitality, retail, multi-unit residential and a specialty group for interior projects.

One of the keys to providing outstanding service for our clients is the care and attitude we take in planning a project for success. 90% of our work is negotiated with clients who recognize the "bottom-line" value that Shaw brings to the planning process. A "Team Managed Approach" is the philosophy we maintain throughout the entire building process. We encourage an open and honest environment that capitalizes on the strength of the entire project team beginning in preconstruction through the construction close-out process. Ultimately, our client's satisfaction and referral is our reward.

Workforce Development Options

Shaw Construction can offer classroom speakers addressing industry diversity, networking development and defining your career path. They also have some short term internships available – please call for details. Contact Diane Miller at 303-825-4740 or at dianem@shawconstruction.net for more information. Shaw Construction is located at

300 Kalamath Street

Denver, CO 80215

Visit their website at www.shawconstruction.net

Mr. Stanek founded Stanek Constructors in March, 1997 to provide construction services for water and wastewater treatment facilities within the State of Colorado. The company has been successful in receiving awards for new construction, expansion and modification, and design-build projects throughout the Southwestern United States.

In April 2004, Stanek Constructors was the recipient of Colorado Construction's Top General Contractors of Colorado. "We have come a long way", says Project Manager Bryan Caudill, "since that first job we did for Squaw Creek in 1997. I am a strong believer in Performance through Teamwork and Stanek Constructors has been fortunate to have assembled a solid group that works well together."

The California Division began in 2006 when Stanek opened an office in Escondido to serve clients throughout Southern California and adjacent states. There is tremendous opportunity within those areas for a contractor with the experience, expertise and employees we have in the region. This was proven by receiving over \$20 million in awards during the first year of operation.

In 1997, Mr. Stanek put together a 10 year plan with aggressive goals. Stanek Constructors has been listed in Inc. Magazine's fastest growing companies in 2007 and 2008. Stanek Constructors will continue its steady growth through an ongoing commitment to safety, quality and establishing strong relationships within the industry. Our commitment to safety is demonstrated by receiving ABC's STEP Platinum Award for Safety for the last three years.

Workforce Development Options

Stanek Constructors can offer classroom speakers on water and wastewater construction, concrete, mechanical, framework, safety, hiring and interviewing. They can also offer training materials such as plans, specs and hands on builder exercises. Please contact Bob Thode at 303-890-8233 or bthode@stanekconstructors.com for more details. Stanek is located at

651 Corporate Circle
Suite 200
Golden, CO 80401

Visit their website at www.stanekconstructors.com

Since 1977, Sunstate Equipment has provided construction, industrial and special event companies with rental tools and equipment. Our reliable service and dedication have helped clients get their job done efficiently and safely.

Renting a full line of quality, well-maintained equipment, from hand tools to heavy equipment, we have continued to grow from our Arizona home. With the trend for users to outsource their equipment needs, we have successfully competed against the changing face of our competitors for over 25 years. Currently, we have locations in California, Nevada, Utah, Colorado, Arizona, New Mexico, Oklahoma and Texas.

Our success stems from providing the highest level of service in the industry. Everyone in the Sunstate family works collectively to ensure your order is completed and delivered on time, all the time. This level of excellence permeates the entire organization. We are proud to offer the best rental equipment with the best trained staff in the industry

Workforce Development Options
