

SILICA EXPOSURE TRAINING

TUESDAY FEBRUARY 23, 2010 · 8:00AM - 11:00AM
 ABC TEC · 2267 W. YALE AVENUE
 ENGLEWOOD, CO 80110

MEMBER PRICING - \$125.00
 NON-MEMBER PRICING \$150.00

Employers have a duty to protect their workers from silica dust exposure on construction projects. Studies have shown that many common construction work tasks involving the sanding, drilling, chipping, grinding, cutting, sawing, sweeping and blasting of concrete and concrete products are conducted without using proper dust controls to limit a workers exposure to airborne silica concentrations. In many cases a workers exposure levels are far above the occupational exposure limits. Long-term or heavy short-term exposures to airborne silica dust can cause a disabling, sometime fatal lung disease called *silicosis*.

Topics Covered:

- What is Silica?
- Purpose of the ECP
- Responsibilities
- Risk identification, assessment and control
- Education and Training
- Safe work procedures
- Health monitoring
- Documentation
