

MOCK OSHA INSPECTIONS

Are you prepared for an OSHA inspection?

Are you aware that OSHA inspections can happen any day of the week?

Do you have employees working on weekends with an “OSHA’s not working today” attitude?

Did you know that a worn strap that was missed during a routine company inspection killed 7 people in New York when a crane collapsed?

Do you have over \$200,000 to give to OSHA to pay for safety violations if that was on your jobsite?

Are you prepared for an OSHA inspection?

ABC has teamed up with Complete Safety to offer Mock Site Safety Inspections as part of the fall and spring series. The inspections include a thorough walk through of your jobsite to determine where your company has exposure to potential safety hazards, potential OSHA citations, and costly penalties. The mock safety inspections will identify physical conditions and workplace practices at your site that are in violation of specific OSHA regulations. During this time, you will be provided on-site recommendations to immediately address safety hazards and OSHA deficiencies so they can be addressed and corrected that day. Impromptu toolbox meetings at no additional charge will be provided if necessary to help your employees remain compliant. Following the inspection you will receive a comprehensive report, including pictures, that document each violation found, the deficient OSHA standard, recommendations for correcting the hazard or deficiency, and the estimated fine amount if OSHA had assessed fines and penalties.

Cost for this service is \$430.00. On average, these inspections identify \$3,600.00 worth of potential OSHA violations. Fewer employee injuries and claims equate to lower compensation insurance premiums.

For more details or to schedule an inspection, please call Cori Gerlitz at 303-832-5812 or email at cgerlitz@abcrmc.org
